

MIMEDX Announces Launch of EPIXPRESS®

October 6, 2025

Next-Generation, Lyophilized Human Placental Allograft Further Expands Company's Broad Portfolio of Advanced Wound Care ("AWC") Products

MARIETTA, Ga., Oct. 06, 2025 (GLOBE NEWSWIRE) -- MiMedx Group, Inc. (Nasdaq: MDXG) ("MIMEDX" or the "Company") today announced the launch of EPIXPRESS®, the Company's newest addition to its portfolio of AWC solutions.

"I am pleased to announce our latest, organically developed addition to our product portfolio today with the launch of EPIXPRESS," said Joseph H. Capper, MIMEDX Chief Executive Officer. "With EPIXPRESS, our R&D team has built upon the fantastic attributes the market loves about EPIEFFECT by incorporating fenestrations to allow for fluid movement through the tissue. A hallmark of our success has been, and will continue to be, a commitment to market-driven innovation."

EPIXPRESS expands MIMEDX's PURION®-processed placental allograft offering aimed at helping clinicians treat acute and chronic, hard-to-heal wounds. Like EPIEFFECT, EPIXPRESS is a lyophilized product, and features a thick, tri-layer configuration. Additionally, EPIXPRESS adds fenestrations to the sheet configurations to help with fluid movement. EPIXPRESS can be used on a wide range of common conditions, such as diabetic foot ulcers ("DFUs") and venous leg ulcers ("VLUs"), and other wound types, including those where the need exists to secure the graft in place with sutures. In addition, its product attributes and handling characteristics make it a preferable treatment option for deep or tunneling wounds.

About EPIXPRESS

EPIXPRESS is a lyophilized human placental-based allograft that includes the amnion layer, intermediate layer, and chorion layer. EPIXPRESS is intended for use as a barrier to provide a protective environment in acute and chronic wounds. The product provides a biocompatible human Extracellular Matrix (ECM) and contains 300+ regulatory proteins. Additionally, like MIMEDX's other Wound products, including EPIFIX®, EPICORD®, EPIEFFECT®, CELERA™ and EMERGE™, EPIXPRESS is listed on the Medicare Part B Average Sales Price File.
