Item 7.01 Regulation FD Disclosure

In connection with the proposed offering described below, MiMedx Group, Inc. anticipates disclosing to prospective investors certain information that has not been previously reported, which information is set forth below.

Recent Developments

The Company has and continues to make substantial progress on commercializing its two biomaterials, HydroFix™ and CollaFix™. However, while the revenues from our first HydroFix™ product introduced earlier this year have increased steadily through the first half of this year, the revenue growth has been below management's expectations. This is a result of a number of industry related factors, including that hospitals are now having most new products reviewed by committees which adds to the time it takes to close a new order. Additionally, the training associated with the introduction of new products of this nature, as well as the challenges of simultaneously setting up our distribution in the U.S., Europe and other areas in the world has taken longer than originally expected. In addition, Q3 revenues have been impacted by an unexpected illness and family medical problem of our European sales representative, which resulted in six weeks of downtime that could not be covered by our US based staff due to critical local priorities. Also, in the US we are gaining a better understanding of our distributors and the forecast information they provide to us on a regular basis. Although we applied a certain level of conservatism to their Q3 and Q4 forecasts when we formulated our previous forecast, it was not enough.

Profit Estimate

The Company is now estimating that Q3 revenue will be in the range of \$100,000 to \$300,000 and Q4 revenue will be in the range of \$500,000 to \$800,000. Correspondingly, net loss before stock based compensation will be between \$2.4 million and \$2.6 million for Q3 and \$2.1 million and \$2.4 million for Q4, which includes the impact of staff reductions to somewhat offset the impact of lower revenue. In effect, our revenue forecasts have moved out at least three months or more, which is pushing our anticipated EBITDA breakeven point out to the spring of next year. Therefore, based upon current near term revenue projections, the Company has decided to raise at least one more round of financing to take us through to what we hope will be our EBITDA breakeven point in the spring of 2011. Please refer to our website for more detail on our updated business plan for 2011 and 2012.

Capital Raise

MiMedx Group, Inc. expects to raise approximately \$5 million through the issuance of common stock and warrants through the offering described below. The Company will use the funds for working purposes, including, without limitation, to support expansion of our distribution channels and to fund our product development and regulatory approval processes.

The information in Item 7.01 of this Current Report on Form 8-K is being furnished and shall not be deemed "filed" for purposes of Section 18 of the Securities Exchange Act of 1934, as amended, or otherwise subject to the liabilities of such section and shall not be incorporated by reference into any registration statement or other document pursuant to the Securities Act of 1933, as amended.

Item 8.01 Other Events

On September 27, 2010, MiMedx Group, Inc., issued a press release announcing that it intends to make an unregistered offering of shares in connection with a Private Investment in Public Equity ("PIPE") offering. The offering is intended to raise approximately \$5 million, the net proceeds of which will be used for working capital purposes, including, without limitation, to support expansion of our distribution channels and to fund our product development and regulatory approval processes.

The PIPE is expected to close in the fourth quarter 2010, subject to market and other customary conditions. There can be no assurance that any such offering will be consummated or completed.

A copy of the press release is attached hereto as Exhibit 99.1 and is incorporated by reference herein.
