**42nd Annual Growth Conference**  
August 2022

# DISCLAIMER & CAUTIONARY STATEMENTS

This presentation includes forward-looking statements.

Statements regarding:

- (i) future sales or sales growth;
- (ii) our 2022 financial outlook and expectations for future financial results, including net sales and levels of selling, general and administrative expense;
- (iii) our expectations regarding the timing of clinical programs and trials;
- (iv) our expectations regarding the timing of new product launches; and
- (v) the effectiveness of amniotic tissue as a therapy for any particular indication or condition.

Additional forward-looking statements may be identified by words such as "believe," "expect," "may," "plan," "goal," "outlook," "potential," "will," "preliminary," and similar expressions, and are based on management's current beliefs and expectations.

Forward-looking statements are subject to risks and uncertainties, and the Company cautions investors against placing undue reliance on such statements.

# DISCLAIMER & CAUTIONARY STATEMENTS

Actual results may differ materially from those set forth in the forward-looking statements. Factors that could cause actual results to differ from expectations include:

- (i) future sales are uncertain and are affected by competition, access to customers, patient access to healthcare providers, and many other factors;
- (ii) the status, timing, results and expected results of the Company's clinical trials and planned regulatory submissions, and our expectations regarding our ability to potentially accelerate the timing of any trial or regulatory submission, depend on a number of factors including favorable trial results, patient access, and our ability to manufacture in accordance with Current Good Manufacturing Practices (CGMP) and appropriate chemistry and manufacturing controls;
- (iii) the Company may change its plans due to unforeseen circumstances, or delays in analyzing and auditing results, and may delay or alter the timeline for future trials, analyses, or public announcements;
- (iv) our access to hospitals and health care provider facilities could be restricted as a result of the ongoing COVID-19 pandemic or other factors;
- (v) the results of scientific research are uncertain and may have little or no value;
- (vi) our ability to sell our products in other countries depends on a number of factors including adequate levels of reimbursement, market acceptance of novel therapies, and our ability to build and manage a direct sales force or third party distribution relationship;
- (vii) the effectiveness of amniotic tissue as a therapy for particular indications or conditions is the subject of further scientific and clinical studies; and
- (viii) we may alter the timing and amount of planned expenditures for research and development based on the results of clinical trials and other regulatory developments. The Company describes additional risks and uncertainties in the Risk Factors section of its most recent annual report and quarterly reports filed with the Securities and Exchange Commission. Any forward-looking statements speak only as of the date of this presentation and the Company assumes no obligation to update any forward-looking statement.

(1) Section 361 includes Tissue + Cord sales. Section 351 includes Micronized + Particulate sales. Advanced Wound Care/Section 361 and Section 351 Sales are Non-GAAP metrics. These two metrics allow investors to better understand the trend in sales between the two different product groups. (2) Adjusted net sales excludes impact of Revenue Transition amounts. Adjusted net sales is a non-GAAP measurement. Our reported net sales, specifically those reported prior to and after the Transition, led to situations where we included revenue recognized on the cash basis and "as-shipped" basis in the same period. Management uses Adjusted Net Sales to provide comparative assessments and understand the trend in the Company's sales across periods, exclusive of effects related to the Company's transition to revenue recognition at the point of shipment. (3) Impact of revenue transition includes cash collected related to the remaining contracts. For a discussion of the revenue transition and the defined terms, refer to Item 8, Notes to the Consolidated Financial Statements in the MIMEDX Group, Inc. Form 10-K for the years ended December 31, 2019 and 2020, and the respective Form 10-Qs for the noted quarterly periods. Note some figures may not add to subtotals due to immaterial rounding differences.
